Profile

I'm a Python-focused software developer. Over the last 7 years, I've been building desktop tools, web projects, and command-line utilities. I love creating user-facing applications the most. I take an interest in how people use software in practice, what they need from it, and how tools can be improved to better support their work. I learn quickly, work independently, and enjoy solving practical problems with coding.

Skills

Prog. Languages:	Python, JavaScript	Databases:	PostgreSQL, SQLite3
Frameworks:	Kivy, Django, Vue.js	CI/CD:	Git, Docker, GitHub Actions
Testing:	Unittest, Selenium	Other:	Figma, Inkscape, GIMP, Photoshop

Projects

- [Vadim's Clicker](#)
Desktop Python application created to automate very basic mouse actions for repetitive, lengthy tasks, with a safe keyboard-controlled toggle for non-disruptive use.
- [relaunch_process](#)
Python utility for restarting Linux processes by process name.
- [Image cropper](#)
Python command-line tool for batch-cropping images.
- [Package creator](#)
Python command-line tool for creating Python package structures.

Education

- Upper Secondary Education (GCSE equivalent) at Ivan Franko Lyceum in Stryi, Ukraine
- C++, GameDev, and WebDev courses at IT School New Age

Spoken Languages

- **English** - fluent
- **Ukrainian** - native
- **Slavic language group** - basic listening and reading comprehension
